

Global Drucker Forum 2026

Lukas Michel will attend the [Global Peter Drucker Forum in Wien](#) this November. This year's theme, "*Next Gen Innovation – When Everything Depends on Ingenuity*," connects closely with our work on the organizational conditions that enable people to contribute, collaborate and create.

We look forward to conversations about *Patterns of Mastery*, Clarity Before Change, the Organization Twin and how leaders can better understand their organizations before deciding what to change.

Will you be there? [Get in touch](#) to arrange a conversation with Lukas.
