MODULE: SUSTAINABILITY

Sustainability (ESG and alike) has become popular in recent years. We agree, corporate development must be sustainable.

To help organizations become more sustainable, we have included 12 elements that explain sustainability as part of our twins and executive surveys. With them, leaders can assess their state of sustainability in their organizations. Easy, fast, precise.

We view sustainability as a quality that turns better management into a competitive advantage.

Sustainability Visuals

The twin overview reports the sustainability index among many other elements of organization and management.

The index is identified through 12 aspects of sustainability: Ecology, energy, resources, climate, engagement, diversity, inclusion, autonomy, compliance, transparency, equality, and balance.

The maturity scale classifies the index in six levels.

Balancing sustainability with management leads to superior results and success.

The Assessment

The executive surveys reviews sustainability as part of an overall organizational assessment to create a twin. The assessment does not prevent companies from fulfilling reporting requirements. But it provides the evidence for an initial analysis.

Since 2002, we create [twins of organizations](#) with the AI-based operating system for dynamic leadership.

[Management Insights](#) is an independent and privately owned company with headquarters in Zuoz, Switzerland.
